

2022 CARE EXCELLENCE AWARD RECIPIENT

Dr. Robert Turcotte on behalf of the entire McGill Sarcoma team

In 2004, a group of healthcare professionals set out to create a center of excellence entirely dedicated to improving care for patients with sarcoma.

Thanks to the leadership of Dr. Robert Turcotte and his team, this clinic now enjoys an international reputation.

All these approaches have made it possible to greatly improve patient care, support and communication within the care teams. In addition to seeing to the care of patients at their clinic, McGill Sarcoma regularly assists various oncology centers across the province. Research and teaching occupy a special place at McGill Sarcoma. They have produced more than 150 publications, given hundreds of presentations and trained numerous residents and researchers.

This clinic is a concrete example of a successful continuum of clinical care, teaching and basic research.
